PROFESSIONAL SUMMARY

BCA graduate (2026) with hands-on projects in churn prediction, Power BI analytics, and RAG-based LLM apps. Skilled in Python, SQL, and Scikit-learn, with experience turning raw data into dashboards, models, and deployed applications. Seeking a Data Analyst / AI/ML Engineer **Internship** to drive data-driven decisions.

EDUCATION

LN GOVERNMENT COLLEGE, BACHELOR OF COMPUTER APPLICATIONS
Chennai, Tamil Nadu
Cum.GPA: 7.25 | Grad: May 2026

MARYS MATRIC HR.SEC.SCHOOL
HSC-2023
Tindivanam, Tamil Nadu
PERCENTAGE: 72.5

PROFESSIONAL DEVELOPMENT

Applied AI & ML Essentials – Vishlesan i-Hub, IIT Patna x Masai Feb 2026 – Aug 2026
(Completed final exam; certificate currently under processing)

PROJECTS

CUSTOMER CHURN PREDICTION | GitHub Repo | Live View

- Implemented leakage-safe data preprocessing and exploratory data analysis (EDA) on 1,000 customer records, developing a churn prediction model achieving 69% accuracy and a 64.33% F1-score on the test dataset.
- Built a Streamlit dashboard with input validation, PII detection, churn predictions, AI-generated explanations, and customer retention recommendations, gaining practical experience in model evaluation, leakage-safe preprocessing, deployment, and explainable AI.
- Tools Used: Python, Scikit-learn, Streamlit.

ADVENTURE WORKS SALES ANALYSIS REPORT | GitHub Repo | Live View

- Developed an interactive e-commerce sales dashboard in Power BI using DAX measures to analyse total revenue, profitability margins, and customer behaviour across 29,000+ transactions. Implemented time-intelligence calculations (MoM growth, MTD/YTD tracking) to evaluate business performance trends.
- Tools Used: Power BI, DAX, Data Modelling

PDF Q&A (RAG) | GitHub Repo | Live View

- Engineered a Retrieval-Augmented Generation pipeline from scratch (no LangChain) using document chunking, embeddings, ChromaDB vector search, and prompt grounding to restrict answers to uploaded PDFs, with filename and page-number citations that reduce hallucinations.
- Deployed a multi-PDF Streamlit web app with secure API-key management, handling multiple PDFs of up to 200 pages (15 MB) each per session.
- Tools Used: Python, Streamlit, ChromaDB, OpenRouter API

LANGUAGES: Python | Java Intermediate | SQL

AI/ML TECHNOLOGIES: Machine Learning | Data Preprocessing | Exploratory Data Analysis(EDA) | NumPy | Pandas | Scikit-learn | RAG/LLMs

TOOLS & TECHNOLOGIES: Git/GitHub | MySQL | Power BI | Cursor IDE | Excel
